PROFESSIONAL SUMMARY

Data Analyst with hands-on project experience in SQL, Power BI, Excel and Python. Built and deployed ProductIQ, a live product strategy app backed by MySQL, and an 8-page Power BI report for hospital operations. Analysed more than 45,000 records across retail, healthcare, call centre and e-commerce data. Strong in data cleaning, validation, KPI reporting and turning analysis into clear business recommendations. Project lead on research published by Springer.

TECHNICAL SKILLS

SQL & Databases: MySQL, Joins, CTEs, Subqueries, Window Functions (RANK, ROW_NUMBER, LAG), Aggregations, CASE, Views, Indexes

BI & Visualization: Power BI, Power Query, DAX, Data Modeling, Drill-down Dashboards, KPI Reporting, Plotly

Excel: Advanced Excel, Pivot Tables, XLOOKUP, VLOOKUP, INDEX-MATCH, SUMIFS/COUNTIFS, Slicers, Charts

Python: pandas, Streamlit, SQLAlchemy, MySQL Connector, Gemini API

Analytics: Data Cleaning, Data Validation, Exploratory Data Analysis, Trend Analysis, Customer Segmentation, Churn Analysis, Customer Lifetime Value, Operations Analytics, Correlation Analysis, Anomaly Detection

Tools: MySQL Workbench, Git, GitHub, VS Code, Google Colab, Streamlit Cloud, Microsoft Word, PowerPoint

PROJECTS

ProductIQ | AI Product Strategy App | Python, MySQL, Power BI, Gemini API Live App | GitHub

- Built and deployed a Streamlit app that classifies a product portfolio into a BCG-inspired growth-share matrix and generates strategy recommendations with the Gemini API in under 30 seconds.
- Loaded 9,994 sales records into MySQL and analysed 1,850 products; classified 1,131 and separated 719 single-year products so they would not distort growth calculations.
- Designed a 2-page Power BI dashboard using Power Query and DAX measures for revenue, profit and margin, with category and region filters.

Columbia Asia Hospital Analysis | Power BI, MySQL, DAX, Power Query GitHub

- Built an 8-page Power BI report with 36 DAX measures on 9,216 hospital visits, with separate views for management, doctors and patient care, drill-down slicers and a metric-switch field parameter.
- Wrote 7 MySQL analysis queries using CTEs, LAG and RANK window functions and subqueries, and matched MySQL and Power BI totals (revenue 509,309,117; average wait 35.26 minutes).
- Found that one department takes 78.6% of visits and recommended 3 new doctors, a two-shift rota and two costed discount rules for patients who waited 50+ minutes or are aged 61+.

Chinook Music Store Analysis | MySQL GitHub

- Wrote SQL queries across an 11-table relational database using joins, CTEs and window functions to analyse sales, customers and products in 24 countries.
- Measured year-on-year customer churn (7.02%, 9.09%, 1.85%) and grouped 59 customers into risk segments, flagging 15 medium-risk customers for retention.

AstroSage Call Centre Analytics | Advanced Excel GitHub

- Cleaned and analysed 28,027 consultation records (29 fields) and built an Excel dashboard with 7 KPIs, 12 charts and slicers using Pivot Tables.
- Found that 46% of callers return and calls bring about 79% of revenue, and recommended how to split an investment of INR 1 crore across five areas.

EXPERIENCE

Scientific Assistant (Data Analysis) | Regional Forensic Science Laboratory Jul 2025 - Oct 2025

- Extracted, validated and reviewed structured and unstructured case data, maintaining data accuracy and integrity.
- Identified patterns and anomalies and documented findings in structured reports with a clear audit trail.

Software Engineer Intern | Comtranse Technology Aug 2021 - Sep 2021

- Supported front-end development and debugging for a team-built application using Python and APIs.

RESEARCH & LEADERSHIP

Project Lead | RAG-based AI Chatbot for University Support Springer, 2025

- Led a team of 5 from problem definition to final presentation; the research was presented at CSCT 2024 and published by Springer (Smart Innovation, Systems and Technologies).

EDUCATION

B.Tech, Computer Science & Engineering | D.Y. Patil College of Engineering & Technology 2025 | CGPA 7.96

Diploma, Computer Engineering | D.Y. Patil Polytechnic | College Topper 2022 | 84.46%
